

Dear Partner,

We are happy to invite your engineers to our international GymnaUniphy service training for Middle East and Asian countries.

Our distributor in Malaysia, Malaysian Healthcare (Maycare), has generously assisted GymnaUniphy to organise this event.

The training itself will take place in the training room of our distributor Malaysian Healthcare.

We organise a refresher training in combination with a training on new equipments.

This formula is meant for engineers who have some years of service experience in Gymna or Uniphy equipment. The training will concentrate on new units, updates, repair tips and communication tools.

In only 2 days your engineers will get a full update of our product range: **maximum result with minimum effort !**

Enclosed you will find a registration form. May we kindly ask you to complete this document and send it back by fax, or e-mail **before 13 September**.

For guaranteed training results, the number of participants will be limited (20 persons).

We have already chosen a 4 star Hotel that has a very good quality for a good price. This hotel is very close to the training location. GymnaUniphy will make the reservations for you upon request. Please confirm this on the registration form.

Details on the hotel and training locations can be found on page 2.

We look forward to meeting you,

With kind regards

Rudy Lambrechts
